Portfolio

PROFESSIONAL SUMMARY

- Software Engineer and Frontend Developer specializing in React.js with expertise in building scalable, responsive web applications.
- Proficient in modern JavaScript frameworks (React.js, Node.js), component-based architecture, and state management solutions.
- Experienced in full-stack development with Python/Django backend and RESTful API integration.
- Strong foundation in software engineering principles including OOP, design patterns, and performance optimization.
- Skilled in Agile development workflows, version control, and collaborative team environments.

TECHNICAL SKILLS

- **Frontend Development:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, React Hooks, Context API
- **Backend Development:** Node.js, Express.js, Python, Django, Django REST Framework, PHP
- **Databases & APIs:** MySQL, MongoDB, REST APIs, CRUD operations, API integration
- **Development Tools:** Git, GitHub, VS Code, Visual Studio, npm, Webpack
- **Programming Languages:** JavaScript, Python, Java, C++, PHP
- **Methodologies:** Agile/Scrum, MVC architecture, Component-based design, Responsive design
- **Additional:** jQuery, Ajax, Linux/Unix, Shell scripting, TensorFlow basics

PROFESSIONAL EXPERIENCE

ALLPRO TECHLABS

Kottakkal, Kerala

React.js Developer Intern

May 2025 – Aug 2025

- Developed and deployed production-ready web applications using React.js, implementing modern frontend architecture and best practices.
- Built responsive, mobile-first user interfaces with Tailwind CSS achieving 100% cross-browser compatibility.
- Implemented advanced state management using React Hooks (useState, useEffect, useReducer) and Context API for complex application flows.
- Integrated RESTful APIs with frontend components, handling asynchronous data operations and error handling.
- Designed and developed reusable React components, reducing code redundancy by 40% across multiple projects.
- Collaborated with cross-functional teams in Agile sprints, participated in daily standups, and conducted peer code reviews.
- Managed Git workflows with multiple collaborators, handled pull requests, and resolved merge conflicts.
- Delivered key projects: Learning Management System (LMS), Movie Discovery App, and Admin Dashboard with data visualizations.

Corezone Solutions

Ernakulam, Kerala

Software Engineer Intern (Python/Django)

Jan 2025 – May 2025

- Engineered scalable backend systems using Python and Django framework with MySQL database integration.
- Designed and implemented RESTful APIs using Django REST Framework for seamless frontend-backend communication.
- Developed secure user authentication systems and role-based access control (RBAC) modules following industry standards.
- Built reusable Django models, views, and serializers adhering to DRY principles and MVC architecture.
- Optimized database queries and implemented indexing strategies, improving application response time by 30%.
- Led full-stack development of a Disaster Relief Management System integrating third-party weather APIs, real-time tracking, and volunteer coordination dashboards.
- Followed Agile development practices with sprint planning, Git-based version control, and comprehensive code documentation.

KEY PROJECTS

Blipkart – Product Management System

React.js, Tailwind CSS, React Bootstrap, Node.js, REST APIs

Jun 2025

- Architected and developed a full-featured e-commerce product management platform using React.js with component-based architecture.
- Implemented efficient state management using React Hooks and Context API, handling complex product catalogs with 1000+ items.
- Integrated RESTful APIs for dynamic product data operations (CRUD) with error handling and loading states.
- Designed responsive UI components using React Bootstrap and Tailwind CSS, ensuring optimal user experience across all devices.
- Established Git workflow for version control with feature branches, enabling seamless team collaboration.

Eventified – Event Management System

PHP, MySQL, Tailwind CSS, Apache Server

Jun 2025

- Built a comprehensive event management platform with secure authentication system for multiple user roles.
- Developed interactive dashboards for event organizers and attendees with real-time data updates.
- Implemented advanced features: ticketing system, community forums, polls, Q&A modules, and payment gateway integration (Stripe).
- Designed responsive frontend using Tailwind CSS with mobile-first approach and accessibility standards.
- Deployed application on Apache Server with optimized database queries for improved performance.

Disaster Relief Management System

Python, Django, SQLyog, Android (Java/Kotlin), REST APIs

Jan 2025 – May 2025

- Engineered an enterprise-level disaster response platform with microservices architecture and real-time coordination capabilities.
- Developed modular system supporting multiple user types: administrators, volunteers, public users, and emergency responders.
- Built cross-platform Android application using Java/Kotlin enabling emergency support requests and donation tracking.
- Integrated AI-driven weather forecasting alerts and automated inventory management for relief camps.
- Implemented RESTful API backend serving mobile and web clients with comprehensive API documentation.

Online Car Showroom Web Application

PHP, MySQL, JavaScript, HTML, CSS, Apache Server

- Developed a full-stack automotive e-commerce platform with dynamic vehicle browsing and booking system.
- Built admin panel for comprehensive inventory management, customer relationship management, and query handling.
- Implemented real-time vehicle search with filters, inquiry forms with validation, and automated email notifications.
- Optimized MySQL database schema with normalization and indexing for fast data retrieval.
- Deployed production application on Apache Server with security best practices and performance tuning.

Personal Portfolio Website

HTML, CSS, JavaScript, Bootstrap

Live: ambadyunnikrishnan.netlify.app

- Created interactive, single-page portfolio showcasing technical projects, professional experience, and skill proficiencies.
- Implemented smooth animations, interactive UI elements, and client-side form validation using vanilla JavaScript.
- Designed responsive layout using Bootstrap framework ensuring seamless experience across all device sizes.
- Integrated social media links (GitHub, LinkedIn) and deployed on Netlify with continuous deployment pipeline.

EDUCATION

- **Bachelor of Computer Applications (BCA)** – Ettumanoorappan College, MGU

2022–2025

Specialization: Information Technology & Software Development

CGPA: 6.80, Grade: B+

PROFESSIONAL SKILLS

- **Software Engineering:** Algorithm design, data structures, debugging, performance optimization, code refactoring
- **Frontend Development:** Responsive design, cross-browser compatibility, accessibility (WCAG), UI/UX implementation
- **Collaboration:** Agile/Scrum methodologies, code reviews, pair programming, technical documentation
- **Leadership:** Mentoring junior developers, project coordination, stakeholder communication
- **Problem-Solving:** System design, troubleshooting, root cause analysis, technical research

CERTIFICATIONS & TRAINING

- React.js Developer Intern Certification – ALLPRO TECHLABS (2025)
- Software Development Intern – Corezone Solutions (2025)

- Full-Stack Development Certification – Simplilearn SkillUP (May 2025)
- Web Development Training – TechSonix Solutions (Apr 2025)
- Web Development Professional Training – Nesote Outsourcing (Apr 2025)
- Build Weather App with React – SkillEcted Campus (May 2025)
- Build RAG Chatbot with Python – LetsUpgrade (May 2025)
- Python (Basic) Certification – HackerRank
- Python Fundamentals – Great Learning (2025)
- Mastering TensorFlow – Simplilearn SkillUP (May 2025)
- Solutions Architecture Simulation – AWS via Forage (Apr 2025)
- Data Analytics Simulation – Deloitte via Forage (Apr 2025)
- Project Management Virtual Experience – Accenture via Forage (Apr 2025)
